IN APPEAL

BEFORE THE FULL COURT. CHAN KI SHUN. APPELLANT D. TSANG HON. This case arose out of a decision given last week by Mr. Justice Leach in Summary Inrisdiction in which the plaintiff applied to have an interim attachment, granted by the torney-General, who represented the other side.

There was no such thing as an interim attach ment in England, and it seemed to have been borrowed here from the Indian Code. There was no precedent to which he could refer their Lordshins, and the matter would therefore have to depend entirely on their reading of the Ordinance. The Acting Chief Justice asked Mr. Francis if he had seen Brocken's Indian Civil Code, and referred him to a case mentioned in a footnote in that book.

Mr. Francis said he had not seen it, and after

reading over the case pointed out, remarked that WASHINGTON, 25th August he thought the finding erronsons. The interim President Cleveland's message to Congress attachment in this case had been issued under the provisions of section 17 of the Summary Jurisdiction Ordinance 14 of 1873 and the claimant in this case came in under sub-section (S. sak for power) to retaliate and suggests means 6. Mr. Francis, having read the section re whereby the greatest injury will be inflicted on ferred to, pointed out that in this case Canada with the least harm to the interests of the property was not in the possession of the person against whom the interim attachment was used, neither was it in the possession o any person holding it for him. The claimant did not come there necessarily to show that the property attached was his. He was under no obligation to do so, though perhaps it might be the most convenient way of proving that it was The twenty-second ordinary meeting of share- not defendant's. Still he was not bound to do so: holders of the above Company was held at the it was quite sufficient to show that the property head office, Queen's Road, yesterday afternoon, was not in the possession of defendant or in that for the purpose of receiving the report of the any person holding it for him. Dr. da Silva; -. under date of the Slat August, remarks that the last death in the algidus stage (cholera asphyxico) took place on the 22nd Auguat; subsequent deaths were in the stages of reaction (cholara typhoido), of persons admitted in-(premonitory diarrhos). Under the heading Asistics in the table there are one Chinaman and the Timor died on the 21st August. Both of them were admitted to the ward in the alridus stage. Of the sick remaining in the lataratto five with diarrhos, three under observation (constipation of the bowels), and three with other complaints of a non-choleraic character. Of the Africans one is suffering from diarrhest, two under observation, and one sentity and anemia. by In view of these data the Doctor thinks it may be confidently considered that the epidemia of cholers morbus is localised and subjued.

In the Roman Catholic Cometery there were buried during the mouth of August 21 persons. Their diseases are classified as follows:—Enteritie, At choleriform, 1; diarrhos-choleriform, 2; favor of paralelous character (congestive form) 1; asthmatic catarrh, l.; pulmonary tuberculosis, 1;

TIENTSIN.

A regular communication by first class passenger steamers between this port and Hongkong and Canton will soon be opened. Just low some large steamers belonging to the Indo-China Company's line come to our port occasionally, but Messrs. Butterfield & Swire

are also going to compate for the trade. Their

vessel, a fast and powerful ship, will arrive here in a few days. An immense body of water has come down from the mountains and higher levels. The Yung-ting of Hun-ho has broken its banks, and the embankment on the Peiho, between Maton and Ho-hsi-wu, has given way or been overflowed. The country between Ho-hei-wu and Tungchow is now hadly flooded. The crops of Indian corn

and millet, which 14 days ago were promising well, indeed, were said to be the finest seen in memory of man,-are in danver of being destroyed. . It is a most miserable state of things, and the floods this year are quite as bad as they were in 1836 and 1887. The works at Port Arthur, entrusted to the French Syndicate, are meeting with considerable hindrance. Of the four sides of the basis three are walled almost completely, wanting only coping stones, we are told, partially at least, but

on the fourth side there is a quickmid, in which it is not easy to obtain stable foundation for the wall. There will, in consequence, be delay and trouble in obtaining a proper basement by piling, concrete, or other methods of hydraulic engineering. In the meantime owing partly to the overflow caused by rains, and partly, it is sue pecced, by some continued leakage from the sea. the basin has an inconvenient quantity of water in it some say 9 feet, others say 12 feet deep The summer season at Port Arthur seems to have been very rainy.

There has been much sickness and considerable mortality in the villages around Tienten, also at Taku. The illness, which is generally of short duration, begins with cramps, collapse ensues, and then death. The strong men are attacked as well as the weak, and in most cases succamb. It is thought open to question whether the epidemic now prevalent amongst the Chinese population is Asiatic cholers, as some of the distinctive symptoms of that dread maledy are lacking in the patients now suffering. But as regards fatality, the disease that has visited us seems quite as deadly, and is also very brief in its conrec. Dr. Macgowan, some years ago, said that the sickness which ravaged Shanghai was Chu Chi, Choi Kan and Tong Yun were charged "dry cholers," and the Tientsin people seem to have something answering to this paress upon
